U. S. ARMY SIGNAL CORPS

"Fire Control"

Fire control instruments shown in action in New Guinea. Photograph by U. S. Army.

VITAL PARTS are these delicate precision instruments for observation and fire direction, insuring perfect functioning under the roughest usage and changing climatic conditions.

These rugged and highly precision military optical instruments produced by Argus for the Armed Forces are the forerunners of better and finer precision telescopic sights and observation scopes for the peacetime sporting rifleman.
